

ThermoHITL v4 operator replay — commercial — step 7

Simulated operator · development evidence · authorized payload only

Multilayer network

Authorized thermodynamic view

Standardized energy	5.411
Entropy anomaly	8.237
Entropy slope	0.487
Belief disagreement	0.405
Consensus confidence	0.667
Free-energy diagnostic	-0.050

Alert, workload, and bounded response

View condition	complete thermodynamic
Reason	belief disagreement
Queue length	2
Operator workload	0.00
Minutes before decision	0.0
Latest action	applied after displayed view

Data provenance and causal progress

View hash: a2c6cbe91ec1582b2c1...

Material/service events visible so far: 0 · evaluator-global and counterfactual fields excluded

The display is a replay of a simulated operator condition, not evidence from a human participant.
